

Global Travel Supplies

SEM[®]

N.Kemal EROĞLU
President

SEM Global Travel Supplies is the division of SEM Plastic Industries Group focused on marketing our Group's Inflight Service Products.

Our Group was established in 1975 mainly focusing on production agricultural technical parts. SEM Plastic used the knowledge and experience it has gained from Agricultural Machine Parts production until 1980's; to become an OEM for Electronic and Telecommunications sector that needs precise standards and very small tolerances and served as sole supplier for honorable companies like ALCATEL, Northern Telecommunications and Termal. In 1982 using knowledge and the quality advantage gained from precise productions for Electronics and Communication Sector and the market demand we started investing in "Production of Plastic Disposables and Inflight Service Equipment" thus

resulting in a wide range of products and specialization in the field of business.

Currently, we are making production in two plants that enables us to offer better transportation rates and delivery times, namely, in the Istanbul plant of 4200 m2, and in Malatya plant of 15000 m2. Up-to date, brand new technological machines and molds from Europe's top machine producers (Netstal, Demag, OMV, TFT etc.) is in production in our plants under most hygienic conditions.

Our business is split between the three major manufacturing processes – extrusion, thermoforming and injection molding - utilizing all the major polymers (PP, PS, ABS, PVC, PC, SAN and PET). Backed by 25 years experience, our company serves more than 380 companies worldwide of those which are 20 airline companies, as well as other Travel organisations and Railroad companies, ferries, food processors and caterers. Our client list supports the company's goal of excellence. Using our products are corporations like Gate Gourmet Usas, LSG Sancak, Mc Donald's, Burger King, Nestle and Danone. Apart from the molds imported from Europe's top mold makers, we are running an in-house mold making department with high technical capabilities and well trained personnel since established, thus giving us the chance to construct a mold for your project in very short period and start production immediately.

Currently exporting to 20 countries in three continents, we follow our client's requirements and their markets with great attention and produce quality products for their markets with Total Quality Management System. We also share our expertise on products, export documentation, cheap freight, market information and many other aspects with our clients. To ensure the competitiveness of our customers we import our raw materials from World approved polymer producers from more than 12 countries worldwide with compatible prices and reflect this benefit to our customers. Hygiene, Health Issues, Environmental Management and Recycling are key factors in our decision taking in production thus necessary checks and certification is made available starting from polymer choosing stage, to storage, to production and finally to delivery procedures. Environmental awareness is what we respect here in SEM Plastic and thus we are the founder and sponsor members of well-known ITU Environmental Organization. Our motto is to bring you practical, hygienic and quality products that are at the LOWEST COSTS in the industry. Thanks to our roots that supply us with experience, as young and dynamic SEM Plastic family, we know that our success depends only on our achievement to make you and your services successful.
